

***“Corynebacterium diphtheriae in Ontario: What’s going on?”***

**Dr. Julianne Kus** FCCM, PhD, MSc  
Deputy Chief of Microbiology and Laboratory Science  
Clinical Microbiologist, Microbiology and Laboratory Services  
Public Health Ontario | Santé publique Ontario

**Dr. Julianne Kus** is Deputy Chief, Microbiology and Laboratory Science at Public Health Ontario. In her role, she oversees the laboratory-wide quality program, biosafety, test utilization, and the pathogen preparedness unit, while leading a team of medical and clinical microbiologists.

After completing the Clinical Microbiology Fellowship at the University of Toronto, Julianne joined PHO in 2013 as a Clinical Microbiologist and has made significant contributions in bacterial reference identification, bacterial vaccine-preventable diseases, and mycology testing and research. She is recognized internationally as an expert in mycology and bacteriology and chairs the Mycology Scientific Committee at the Institute of Quality Management in Healthcare, is a volunteer with several groups within the Clinical Laboratory Standards Institute and serves on editorial boards for Medical Mycology and the Journal of Clinical Microbiology. Julianne is also an Assistant Professor, Laboratory Medicine and Pathobiology at the University of Toronto.
